

# Eastgate/Meadowood Septic to Sanitary Sewer Conversion

## PROJECT UPDATE

Sept 24, 2014

Mayfield Village is continuing to move forward with the conversion of septic to sanitary sewers on Eastgate Drive and Meadowood Road. This project will involve the installation of a new waterline, sanitary sewer line, and replacement of both roadways.

The project was advertised for bid and **DiGioia Suburban Excavating** has been selected as the contractor. Contracts are being finalized and a detailed work schedule is being developed; however, work will begin later this year and will continue through 2015.

**During the week of Sept 29 through Oct 3, the Village Engineer's Office will stake each property to show where sanitary connections are being proposed. If you have a question about the proposed location or desire any changes, please contact the Engineer's Office immediately.**

Detailed information, including a list of sewer contractors who can make your connection, has been mailed to all property owners. For your convenience, all information and updates are also posted on the home page of the Mayfield Village website at:
