

Eastgate/Meadowood Septic to Sanitary Sewer Conversion

PROJECT UPDATE

April 23, 2015

Thanks to those of you that attended the resident meeting on April 15th. The materials provided at the meeting are on the website for those of you that could not attend at www.mayfieldvillage.com.

DRIVEWAY APRONS. This project includes the installation of new concrete driveway aprons at each property. During the meeting, some residents stated that they are planning to replace their entire driveway and prefer that the Village issue them a credit rather than install the apron. The credit is \$5.28/sq. ft. As each driveway apron is different, your individual credit will be calculated upon notification that you do not want your apron replaced.

CULVERTING/FILLING SWALES. Some residents also indicated that they might like to have their swale filled and a culvert pipe installed. DiGioia Excavating is willing to do this additional work at a cost of \$55 to \$70 per linear foot, depending on whether off-site fill will be needed. There are additional charges if a hydrant must be moved or a catch basin raised. **Please note that the Village maintains all open swales but, if a culvert is installed, any future repairs will be the responsibility of the homeowner.**

Information about these items must be transmitted to the contractor as soon as possible. If you do not want to have an apron installed or would like a more definite cost estimate to fill and culvert your swale, please contact Diane Wolgamuth, Director of Administration, at 440-261-2210, ext. 1048. Thank you.

If you have other questions about the project, contact :
Village Engineer Tom Cappello at 216-731-6255 or
Service Director Doug Metzung at 440-442-5506 or
send an email to contactus@mayfieldvillage.com.
