

Worton Park Culvert Replacement Project Phase I—Worton Park and N. Woodlane Culverts

Dear Residents,

On May 16, 2022, Mayfield Village Council approved the bid of Great Lakes Crushing, Ltd. for Phase I of the Worton Park Culvert Replacement Project, which includes the replacement of two culverts—one on Worton Park Drive near Hemingway Road and one on North Woodlane Drive. All neighborhood culverts are being increased in size to reduce neighborhood flooding with Phase 2 being planned in 2023.

Timing: All necessary easements have been obtained and work is expected to commence the week of August 1, with site clearing and miscellaneous preparatory work. Excavation of the North Woodlane culvert is expected to begin by the end of August. After completing installation there, the contractor will begin excavation of the Worton Park culvert, likely by mid-October. Installation of the culvert headwalls and asphalt paving will not take place until both culverts have been completed.

Ingress/Egress: Local traffic will be maintained for all neighborhood residents and detour signs will be posted as needed. Please expect delays if attempting to drive through the work zone and use alternate routes as much as possible.

Hours/Duration: Crews will be working Monday thru Thursday from 7 a.m. to 5 p.m. with Friday hours as needed. The duration of the project is projected to be 90 days but, as always, work is weather dependent and delays may occur. Substantial completion and site restoration may be delayed until Spring 2023. Your patience is appreciated.

Throughout the project, Great Lakes Crushing will provide direct advance notice to residents if there are any temporary road closures, if water service needs to be shut off for any period of time, or if driveway access will be limited.
