RE: Council caucus items

1. Spring Tree planting. We are planning on planting between 50-60 trees this spring. Planting will include the North Commons Medians where most of the original trees planted there 20 years ago have failed. We will be placing trees in the area to the north of Parkview and SOM (in front of Progressive Campus 2) where some of the mature trees from the golf course are showing signs of distress. We are also going to replace the four crab apple trees in front of the Community Room. Plans include planting a tree at the Civic Center and one at the new softball parking lot. And finally, we will begin to reforest the Bonnieview/ Beech Hill lot. Our Arborist Frank Stupczy is currently getting quotes from local nurseries. Based on preliminary quotes, we expect the request to not exceed \$8,500.
